

Chenland Devotes to Resist COVID-19

The Significant Contribution of Complementary and Alternative Medicine

The outbreak of COVID-19 has become an international public health crisis these days and it brings huge losses to the countries worldwide. How to prevent and control the COVID-19 now is a global issue. The resistibility of virus carriers themselves is the key to fight against the virus. Taking scientific and rational dietary supplements can effectively improve the resistibility and thus help the prevention and recovery of COVID-19.

In the initial stage of the COVID-19 outbreak, China prevented and treated this epidemic utilized in over 2000 years of anti-epidemic herbal formulas to substitute contemporary medicine therapies. Treatment like this serves the rehabilitation of patients as well as reduce aftereffects. So far, such treatment has gained periodic success in fighting against the COVID-19. Numbers of U.S therapists, hospitals and health centers showed interest in complementary and alternative medicine, especially those chronic and complex disease patients.

Chenland Nutritionals, Inc., as a manufacturer of branded natural dietary ingredients, innovatively developed a series of efficacy tested dietary ingredients utilizing selected raw materials of global GAP natural herbs and marine organisms, incorporated with international advanced technology. Among all the products, Maximmune™ and MoodElite™ are highly recommended by Chinese medical organizations for their significant positive effects on the prevention and treatment of COVID-19 and other adjustment disorders. In February, the New Product Insider, a leading information sources for global nutrition industry, carried out an exclusive interview with Sherry Guo, the director managing of Chenland International for North America. The New Product Insider also advertised the introduction of Chenland natural dietary supplements and branded ingredients.

Derived from the global health industry, Chenland will continue to strive for excellence and innovation with the purpose of providing safe and reliable natural dietary supplements for the industry.

Chenland™ Series: 

**Combatting COVID-19
Through Your Body and Mind**

Maximmune™ is a natural dietary supplement, specially formulated botanical complex with three traditional Chinese herbs: Astragalus, Atractylodes and Saposhnikovia. More than 1,000 science reports have proven its effect on breath health, lung health, immunity, and anti-viral properties^[1].

Previous studies have confirmed that the long-term use of Astragalus can improve the body's immune function^[2]. Additionally, Atractylodes studies found anti-inflammatory, anti-thermal stress, and improved immune effects from herb usage while Saposhnikovia studies highlighted the anti-arthritis potential within collagen induced arthritic rats.^{[3][4]}

Recurrence of acute exacerbations has a major impact on patients with chronic obstructive pulmonary disease (COPD). Extensive effort is placed on methods to effectively treat and manage exacerbation in patients with COPD. One randomized, placebo-controlled study reported significantly reduced exacerbation rate in COPD patients >60 years old after a 52-week treatment of a TCM formula containing Astragalus, Atractylodes, and Saposhnikovia (15g/day). Treatment with the formula was found to improve incidence of exacerbation by 32.3% indicating preventative effects against exacerbation.^[5]

Due to the recent outbreak of COVID-19

many individuals have reported an increase in anxiety, stress, and symptoms of insomnia. Research data indicates that MoodElite™ is a good choice to alleviate anxiety, balance mental stress, promote sleep, and regulate your overall mood. We further studied this effect through in-vivo treatments in mice subjects. Tail-hanging study showed that MoodElite™ can effectively shorten the time that mice give up struggling. It improves their depression and increases excitability. While both MoodElite™ and St. John's wort tablets effectively improved depression, MoodElite™ required only 500 mg/d to reach the desired effect compared to 900 mg/d for SJW.

MOODELITE

Distinguish yourself in the marketplace and let MoodElite™ light your day.
