# The Underestimated Risk for High Blood Pressure Complications

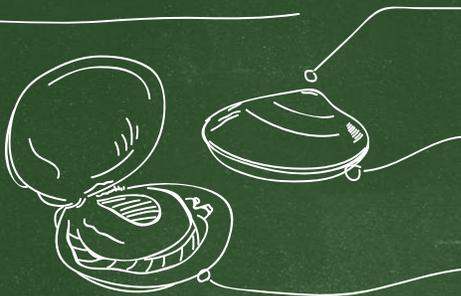

Hypertension is a major cause of premature death worldwide. Hypertension not only causes coronary heart disease, myocardial infarction, heart failure, cerebral infarction and cerebral hemorrhage, but also leads to renal damage and even renal failure. The mechanism of kidney damage has two aspects: Blood vessel constriction leading to high blood pressure, eventually leading up to permanent ischemic kidney damage.

Therefore, it's important to treat high blood pressure early to prevent prolonged kidney damage. While controlling blood pressure, it is necessary to reduce the burden on the kidneys to avoid the adverse effects of excessive blood pressure on the kidneys and promote long-term kidney health.

## ClamBP™ Opens a New Market for Kidney Health Improvement and Promoting Healthy Blood Pressure

With the ideal of developing healthy solutions from marine sources, Chenland has been focusing on marine environmental biological research to explore the medicinal value of natural marine ingredients. During our latest studies, we have found that natural clams can provide considerable health benefits. In this way, a new mystery from the deep ocean was uncovered.

### What Are Clams ?

Clams are bivalve mollusks, which refers to a type of seafood enclosed by a shell.

This shellfish lives on the sandy ocean floor, and is featured in most cuisines around the world.

This popular shellfish offers exceptional nutrient density, and they are full of beneficial vitamins and minerals.

1. Helps You Regulate Blood Pressure
2. Great for Males' Fertility
3. Great for Collagen Synthesis
4. Contain Lots of Vitamin B12
5. Clams Provide Iron
6. Loaded with Protein
7. Great for Thyroid Health
8. Good for Your Heart
9. Prevents RA (Rheumatoid Arthritis)
10. Excellent Source of Choline
11. Rich in Riboflavin

ClamBP™ is a new generation of all-natural marine based dietary supplement that can effectively help improve blood pressure and help nourish kidney health at the same time. As the first antihypertensive peptide product developed using patented enzymatic hydrolysis technology (EnzyTide™), ClamBP™ has innovative features such as high product yield, mild and easy-to-control production conditions, high safety, and many more product advantages. As the world's first company to successfully develop a nutritionally beneficial functional peptides of clams, we believe that ClamBP™ will be a key ingredient-grade product to pave the pathway to blood pressure and kidney health.

## Health Benefits

Helps improve the glomerular structure changes, inflammation, and collagen deposition

Lowers blood pressure moderately

Helps improve the kidney health with hypertension

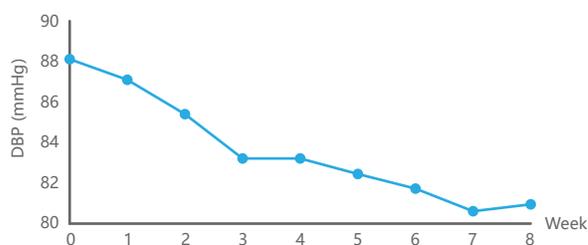

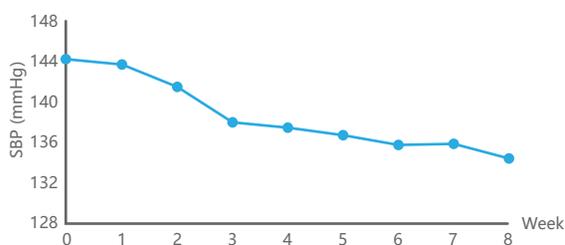

Improves heart and vessel health

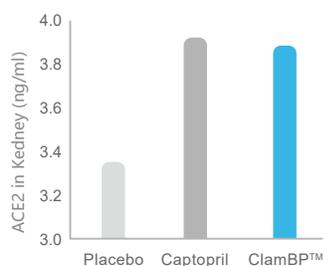

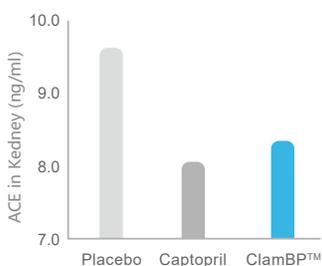

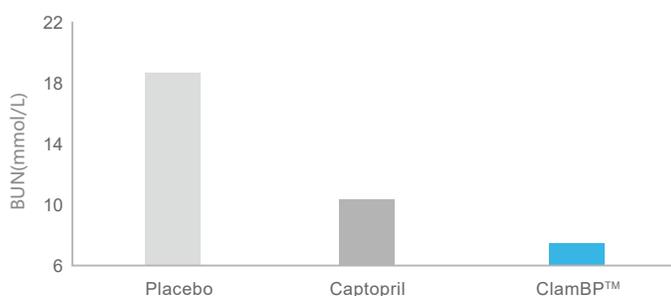

## Clinical Research Data Support

The results of an 8-week open-label clinical study show that ClamBP™ is safe and effective in reducing high blood pressure. The results showed that systolic blood pressure (SBP) dropped from grade I hypertension to high normal blood pressure, and diastolic blood pressure (DBP) returned to normal.

## Pre-Clinical Study

BUN (Blood urea nitrogen) testing can provide a basis for the assessment of kidney damage. Compared with placebo, ClamBP™ can effectively reduce the concentration of BUN.

At the same time, ClamBP™ can reduce the concentration of ACE in the kidney of SHR and increase the concentration of ACE2, which shows that ClamBP™ can effectively boost and protect kidney health.

## Chenland, leading the health track of marine ingredient wave

ClamBP™ is extracted from natural clams, therefore, this nutrient does not have any toxic side effects. These are advantages that general antihypertensive drugs cannot compare. This latest research discovery will further develop a broader application scenario for dietary supplement and health, bring good news to people suffering from high blood pressure, and provide safer and more effective options for helping stabilize normal blood pressure and nourishing long-term kidney health.

### Upcoming Trade Shows

SupplySide EAST

Aug 24-25, 2021 Secaucus, NJ, USA  
Booth #335

Natural Products EXPO EAST

Sept 23-25, 2021 Philadelphia, USA  
Booth #3805+3807

Vitafoods Europe

Oct 5-7, 2021 Geneva, Switzerland  
Booth #E299

SupplySide WEST

Oct 25-28, 2021 Las Vegas, NV, USA  
Booth #5681

中国国际进口博览会  
CHINA INTERNATIONAL IMPORT EXPO

Nov 5-10, 2021 Shanghai, China  
Booth #TBA

Enriching Quality of Life

Chenland Nutritionals, Inc.

Chenland Nutritionals, Inc. is a leading supplier of natural branded ingredients. Our global headquarter is in Irvine, California. We select only globally certified GAP herbs and marine organisms to ensure our ingredients promote safety, quality, and sustainability. We specialize in TCM-based brand ingredients scientifically backed through in-vitro and in-vivo testing, alongside preclinical and clinical trials. We are committed to providing our customers with innovative solutions to health problems and meeting the world's growing natural nutritional needs.
